

MOHAMMAD MAKKI

AI Solutions Architect · Senior AI & Automation Engineer · Full-Stack Developer

Beirut, Lebanon (fully remote, GMT+3) • +961 76 556 037 • makki.51x3@gmail.com • linkedin.com/in/mohammad-makki-68810b228 • mohammad-makki-portfolio.netlify.app • commandnetsolutions.com

PROFESSIONAL SUMMARY

AI solutions architect and senior automation engineer with 100+ shipped projects (2019–present), many under NDA, for clients across Lebanon, KSA, the UAE, Oman, USA and Europe. I take products from business diagnosis to production: LLM agents and RAG systems, n8n orchestration, FastAPI/Laravel services, Shopify and e-commerce automation, MT5 trading infrastructure, and hardened Linux VPS deployments.

CORE SKILLS

AI & LLM systems: LLM agents, RAG, tool calling, prompt/system design, Claude · OpenAI · OpenRouter, Chatbase, ElizaOS, computer vision, TensorFlow/Keras, Colab TPU/GPU

Automation & integration: n8n, Apache Airflow DAGs, ManyChat, Playwright/Selenium, AutoHotkey, Telegram/WhatsApp/Meta Graph APIs, Stripe, HubSpot (quotes, invoices, subscriptions), Klaviyo/Brevo, Google Forms funnels

Backend & data: Python (FastAPI, Flask), Node.js, Laravel/PHP, TypeScript, PostgreSQL/TimescaleDB, MySQL, MongoDB, Redis, Supabase, PayloadCMS, REST/GraphQL, ETL, Django

Frontend & design: React, Next.js, React Native, Framer, lit Element (web components), GSAP/WebGL, Liquid, Core Web Vitals, RTL/Arabic localisation, Figma, Canva

E-commerce: Shopify apps & themes, Shopify Plus, WooCommerce, DSers dropshipping, metaobjects bulk import, price intelligence

Infrastructure & security: Linux VPS, Docker, systemd, Nginx/PM2, CI/CD, Proxmox, VMware, VirtualBox, WSL, Wine-based MT5 terminals, Tailscale VPN, Plesk/cPanel, penetration testing basics, Netlify/Vercel/Render/Cloudflare

ERP, POS & IoT: Odoo (POS, inventory, invoicing, dashboards), ERPNext, ZKTeco biometrics, Lark/Slack/Teams, Arduino/Raspberry Pi

Generative media: Higgsfield, Sora/Veo, Midjourney/Flux, ElevenLabs voice cloning, Suno music, CapCut, NotebookLM, FFmpeg

PROFESSIONAL EXPERIENCE

Co-founder · Tech Lead — CommandNet Solutions · Beirut, Lebanon 2022 – Present

- Co-founded a 20-person, five-team AI-marketing and web/app-development startup; lead the Web-Dev team and contribute across SEO and DMP/automation.
- Delivered client builds (Natlaupa, Nafas, Chemigaz) alongside in-house AI products; ran a hands-on workshop for 25+ interns and instructors at Beirut Digital District.
- Use Claude Code, MCP connectors and browser/desktop automation to accelerate delivery, testing and troubleshooting for client systems.

AI Software Engineer — Creoshift · Remote Oct 2022 – Present

- Design AI-powered n8n workflows that automate operational, business and data processes; integrate LLM features into Shopify-based products.
- Built Laravel and Lit-based full-stack systems; contributed to open-source ElizaOS agent capabilities.
- Shipped production AI for real storefronts: Naqua recipe chatbot, OMIC-AI skincare recommendations, Narins Beauty support agent, Feel22 AI stack research, and many more.

Freelance AI / Software Consultant — Upwork, Chegg, local startups · Remote May 2019 – Present

- AI trading platform (Axon, app.axontrade.cloud): FastAPI + MT5 multi-terminal execution, Telegram/WhatsApp signal ingestion, billing, auth & notifications, security hardening (All of the platform built from scratch).
- Cross-platform apps and tools with Expo, Flutter, Flask, React Native, Selenium, .NET; dashboards, scraping/monitoring tools and AI-assisted operations for SMEs.

Application Developer (contract) — Lamah House Jun 2022 – Sep 2022

- TypeScript/Flask application development for the Moussa Lamah real-estate team.

Software & Crypto Consultant — International Solutions For General Service · Oman Sep 2021 – Feb 2022

- Built and deployed an Odoo point-of-sale system for a laundry business (catalogue, pricing, inventory, invoicing) with secure remote access over Tailscale/VPN.
- Researched crypto product feasibility and compliance; produced technical reports for stakeholders.

Software Intern — Dar Kuwaiti Engineering Group · Kuwait Jan 2021 – Jun 2021

- QA and React Native + Redux development on a production e-commerce app.

Founder & Tutor — AcesTeamCo · Lebanon Dec 2019 – Mar 2022

- Ran a tutoring organization with ~40 tutors; taught Python, C/C++, Java, ML fundamentals, embedded systems and web development.

SELECTED PROJECTS

- **Axon — AI trading platform:** MT5 ecosystem with FastAPI backend, multi-terminal sync, Telegram assistant, admin dashboard, subscriptions and n8n automation on a hardened VPS.
- **Naqua — AI recipe chatbot:** Per-product LLM context on seafood storefronts, Arabic RTL, halal-only enforcement; MVP to production.
- **OMIC-AI — skincare recommendation engine:** Quiz + image-based recommendations across US and MENA storefronts (Laravel, image AI, Arabic i18n).
- **Narins Beauty — AI support agent:** Bilingual Chatbase agent with order tracking, escalation form and a Laravel Shopify proxy API.
- **BodyForce Gym — ZKTeco ERP:** Biometric access control wired into membership, attendance and billing.
- **Ingredient Benefits Bulk Importer:** Custom Shopify app: Excel → metaobjects with batched syncs and test-before-live validation.
- **4T — real-time trading dashboard:** Next.js dashboard over WebSocket market feeds, Docker + CI, auto-scaling under news spikes.
- **KenChat — Chrome extension · SABB national-anthem campaign · VisuFit AI try-on studio · Smart Stories templates & GraphQL widgets**

EDUCATION

B.E. Computer Engineering — Beirut Arab University 2017 – 2021

PUBLICATIONS, AWARDS & CERTIFICATIONS

- IEEE paper: “Thalassemia Diagnosis Through Medical Imaging: A New AI-Based Framework”, IC2SPM 2022
- Innovation Award — Industrial Research Achievements Lebanon (LIRA 2022)
- IC3 Digital Literacy (Certiport) · IELTS · SAT · Team Building Workshop (Aie Serve)
