A) Technique: Heat Debossing

Heat debossing uses heat and pressure to imprint a design directly into the leather without ink or foil, creating a subtle, tone-on-tone impression. This technique allows for personalization using all the characters mentioned above.

Examples:

B) Technique: Foil Stamping

Foil stamping uses heat and pressure to apply a **gold** or **silver** colored foil onto the leather surface, creating a premium, high-contrast finish.

Foil stamping allows for personalization using the same characters mentioned above.
